

Screen- and stencil printers S1 - SXXL

Stand: 07/2025

Manual stencil printer S1

- incl. variable rapid tensioning system (2 fold)
- PCB size: max. 300 x 250 mm

Manual precision screen and stencil printer S10

- incl. rapid tensioning frame
- Frame size: max. 540 x 470 mm
- table lowering: automatical

Precision squeegee guided screen and stencil printer S20

- incl. rapid tensioning frame
- Frame size: max. 540 x 470 mm
- table lowering: automatical

Auto drive screen and stencil printer S30

- incl. rapid tensioning frame
- Frame size: max. 540 x 470 mm
- Printing parameters: adjustable and programmable

Auto drive screen and stencil printer S40

- incl. vision system and rapid tensioning frame
- Frame size: max. 540 x 470 mm
- Printing parameters: adjustable and programmable

Precision squeegee guided screen and stencil printer S50

- incl. rapid tensioning frame
- Frame size: max. 584 x 584 mm
- Printing parameters: adjustable and programmable

Auto drive screen and stencil printer S60

- incl. rapid tensioning frame
- Frame size: max. 584 x 584 mm
- Printing parameters: adjustable and programmable

Auto drive screen and stencil printer S70

- incl. vision system and rapid tensioning frame
- Frame size: max. 584 x 584 mm
- Printing parameters: adjustable and programmable

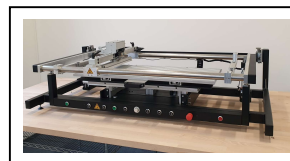

Auto drive screen and stencil printer S80

- incl. rapid tensioning frame
- Frame size: max. 736 x 584 mm
- Printing parameters: adjustable and programmable

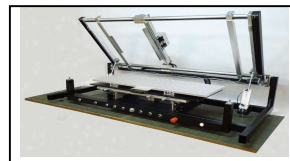

Auto drive screen and stencil printer S90

- incl. vision system and rapid tensioning frame
- Frame size: max. 736 x 584 mm
- Printing parameters: adjustable and programmable

Auto drive screen and stencil printer SXL

- incl. vision system
- Frame size: max. 1200 x 600 mm
- Printing parameters: adjustable and programmable

Auto drive screen and stencil printer SXXL

- incl. vision system
- Frame size: max. 1800 x 800 mm
- Printing parameters: adjustable and programmable
